

/home/etudiant/Bureau
/TP2/Sources/ContratException.h

```
graph BT; A["/home/etudiant/Bureau/TP2/Sources/ContratException.h"] --> B["/home/etudiant/Bureau/TP2/Sources/ContratException.cpp"]; A --> C["/home/etudiant/Bureau/TP2/Sources/Journal.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: /home/etudiant/Bureau/TP2/Sources/ContratException.h. Below it are two white boxes representing source files: /home/etudiant/Bureau/TP2/Sources/ContratException.cpp on the left and /home/etudiant/Bureau/TP2/Sources/Journal.cpp on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.
